What we finished:

Repo link:

https://github.com/ahmedabdelrahim123/E-CommerceProject/tree/main

Front:

1-login

2-register

3-home

4- Products page

5-Product details

6-add to cart

7-checkout

8-about us

9-contact us

10-header

11-footer

12-User Profile

Back:

1-Authentication

2-user crud

3-order crud

What we didn't finish:

1- product cruds

2-middlewares and permissions

3- domain instead of localhost

4- testing the whole project

5-add products

The work of the team:

1-Ahmed Samir:

-Login

-Register

-Authentication

-Authorization

2-Donia:

-Profile

-Product details

-User crud

3-Wafaa:

-Products page

-Add to cart

-Checkout page

4-AbdElRahim:

-Header

-Footer

-Orders crud

5-Mariam bakry:

-Contact us

-Home page

-About us

6-Samar:

-creation of database

-Validation on the forms of login and register

-upload image during registration front and back

-routing

-connect the front with the back
